16th symposium on nucleic acid chemistry Liver cancer (hepatocellular carcinoma, HCC) is one of the most common malignancies worldwide and is particularly prevalent in Asia. Liver cancer is an aggressive cancer associated with a poor prognosis that is often due to late presentation of symptoms and frequent cancer metastasis.

Dr WONG Chun Ming, Jack - University of Hong Kong

16th symposium on nucleic acid chemistry Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.
