1998 ieee international power electronics congress [Farabet et al. 2013]: Learning Hierarchical Features for Scene Labeling, scheduled to appear in the special issue on deep learning of IEEE Trans. on Pattern Analysis and Machine Intelligence. The task is to label all the pixels in an image with the category of the object it belongs to. This is sometimes called scene labeling, scene parsing, or semantic segmentation.

1998 ieee international power electronics congress To secure uninterrupted distribution of electricity, effective monitoring and maintenance of power lines are needed. This literature review article aims to give a wide overview of the possibilities provided by modern remote sensing sensors in power line corridor surveys and to discuss the potential and limitations of different approaches.

1998 ieee international power electronics congress World leaders, CEOs, and academics have suggested that a revolution in artificial intelligence is upon us. Are they right, and what will advances in artificial intelligence mean for international competition and the balance of power? This article evaluates how developments in artificial intelligence (AI) " advanced, narrow applications in particular " are poised to influence military power ...

1998 ieee international power electronics congress The Oberfranken study evaluated medical complaints of 356 people with long-term radiation in their homes. Above 100 microW/m², only 5-6% of the people did not have adverse health effects. This is a level far below current safety standards. Compare the radiation received from typical Wi-Fi routers and mobile phone base stations by applying the Inverse Square Law.
