1 2 3 puberty for boys a guide for curious boys in full color Size and virility. In boys, testicular enlargement is the first physical manifestation of puberty (and is termed gonadarche). Testes in prepubertal boys change little in size from about 1 year of age to the onset of puberty, averaging about 2â€“3 cm in length and about 1.5â€“2 cm in width. The size of the testicles is among the parameters of the Tanner scale for male genitals, from stage I ...

1 2 3 puberty for boys a guide for curious boys in full color Endocrine disruption: The European commission has determined that there is sufficient evidence that DBP and DEHP leads to endocrine disruption in living organism. In addition, the Endocrine Disruption Exchange (TEDX) includes DEP, DEHP, and DBP as endocrine disruptors. Two decades of research suggest that phthalates disrupt hormones, which can lead to harm during critical periods of development.

1 2 3 puberty for boys a guide for curious boys in full color Endocrine disruption: Parabens are potential endocrine disruptors due to their ability to mimic estrogen. In cell studies, parabens have been found to weakly bind to estrogen receptors. Studies demonstrate that at sufficient concentrations, parabens can increase cell proliferation in human breast cancer MCF-7 cells, which are often used as a sensitive measure of estrogenic activity.
