1 message The Java Message Service (JMS) API is a Java message-oriented middleware API for sending messages between two or more clients. It is an implementation to handle the producer–consumer problem. JMS is a part of the Java Platform, Enterprise Edition (Java EE), and was defined by a specification developed at Sun Microsystems, but which has since been guided by the Java Community Process.

1 message Setting boundaries is an important part of establishing one's identity, as well as being crucial for one's mental health and well-being. There are different types of boundaries, from physical boundaries to emotional boundaries, and there are also different levels of boundaries, from loose to rigid, with healthy boundaries falling somewhere in between.
